

Sicily Grey marble

Commercial name: Billiemi Grey

Type of material: Limestone breach

Extraction area: Palermo

Application: Flooring and/or internal and external coatings

Manufacturing: Honed, Polished and Bush hammered

Petrographic features:

- Volumetric mass: 2.70 gr/cm³
- Compressive strength: 1,430 Kg/cm²
- Compressive strength after freezing process: 1,180 Kg/cm²
- Absorption coefficient: 0.12
- Compression breaking load after freezing process: 1,226 Kg/cm²
- Imbibition coefficient: 0.0141%
- Wear Index: 4 Mm/Km
